This report transforms historical sales data from Bright Coffee Shop into actionable insights — highlighting trends, top performers, and opportunities to drive revenue growth across all locations.

01 Introduction

As part of the company's new strategic direction under the recently appointed CEO, our goal is to **grow overall revenue** and enhance product performance across all Bright Coffee Shop locations.

This report walks through a data-driven analysis of recent sales — highlighting key trends, identifying top- and under-performing products, and uncovering opportunities to drive growth and efficiency.

By the end, we will have a clearer understanding of where the business stands today and what strategic actions can help us reach our revenue goals.

PEAK MONTH (JUNE)

100%+

H1 GROWTH

02 Total Revenue by Store Location

KEY TAKEAWAY

Each location contributes roughly one third of total sales, showing a balanced performance across branches. **Hell's Kitchen leads slightly at 34%**, suggesting marginally higher customer volume than its peers.

Location	Revenue Share	Status
Hell's Kitchen	34%	Leader
Astoria	33%	On par
Lower Manhattan	33%	On par

03 Monthly Store Performance

KEY TAKEAWAY

June recorded the highest revenue at R56,957, while January was the lowest at R27,821 — only 49% of June's sales. The strong upward trend through H1 reflects post-holiday recovery and growing winter demand for warm beverages.

JAN → JUN GROWTH

04 Total Revenue by Product Category

KEY TAKEAWAY

Coffee Beans (30%) and Branded products (25%) are the top performers, together contributing over half of total sales. Flavours (0.1%) and Bakery (5.7%) underperform — highlighting clear opportunities in lower-selling categories.

05 Total Revenue by Time of Day

KEY TAKEAWAY

A clear morning peak — likely driven by coffee and breakfast demand — accounts for **more than half of daily revenue**. Evening sales drop off significantly, signalling an opportunity to drive after-work traffic.

- **Morning (06:00–11:59)** generates 55.6% — the strongest period.
- **Afternoon (12:00–16:59)** generates 29.3% — consistent mid-day activity.
- **Evening (17:00–23:59)** generates 15.1% — reduced engagement late in the day.

06 Total Revenue by Weekday

KEY TAKEAWAY

Revenue is remarkably **consistent across all seven days** (13.9%–14.6%). Friday is the strongest, Saturday slightly the weakest. Sales do not depend heavily on any single day — a healthy signal of stable customer demand.

07 Key Insights

Revenue Growth

Sales rose steadily from January (R27.8K) to June (R57K) — over 100% mid-year growth, indicating strong momentum heading into the second half.

Balanced Locations

Revenue is evenly split across stores: Hell's Kitchen 34%, Astoria 33%, Lower Manhattan 33% — consistent performance with no weak branch.

Category Concentration

Coffee Beans (30%) and Branded products (25%) drive over half of revenue. Flavours and Bakery remain underdeveloped opportunities.

Morning Dominance

Mornings deliver 56% of revenue while evenings contribute just 15% — a clear case for evening promotions or extended product mixes.

08 Recommendations

Five focused initiatives to convert these insights into revenue growth:

01	Seasonal Specials Limited-time drinks (pumpkin spice in autumn, iced matcha in summer) create urgency and lift average ticket size.
02	Localized Promotions Neighbourhood-specific campaigns such as “Astoria Appreciation Week” to deepen community ties and drive repeat visits.
03	Referral Incentives Reward customers who bring friends with discounts or a free drink — low-cost acquisition with high retention.
04	Social Media Challenges Run Instagram or TikTok campaigns like “Best Latte Art” or “Tea Time Trivia” to boost organic engagement.
05	Customer Feedback Loop Use surveys or QR-code feedback forms to learn what customers want more of and refine the menu accordingly.
